

## The Traumpass label at a glance

### **Safety thanks to certified quality**

Traumpass products are subject to strict quality controls and are monitored by internationally recognised certification company DIN CERTCO.

### **Not from living animals**

Bedding with the Traumpass seal exclusively uses down and feathers that have not been acquired from living animals. The origins of the down and feathers are documented so as to ensure traceability.

### **Top quality in accordance with DIN EN 12934**

DIN EN 12934 is the European standard for products made from down and feathers. Traumpass products may only use materials that adhere to the highest quality categories.

# Certified Quality

## Down and feathers – DIN-tested

The “Traupass DIN-tested” seal is a mark of quality assurance for bedding that uses down and feathers as filling material.

The Traupass seal was developed by DIN CERTCO (the TÜV Rheinland AG and the DIN Deutsches Institut für Normung e.V. certification company) in cooperation with Traupass e.V.

DIN CERTCO monitors not only the quality of the down and feathers used, but also their traceability. The certification company ensures that Traupass e.V. only awards the seal in accordance with the strict rules.

## Not from living animals

Companies agree not to use down and feathers from living animals in products awarded the Traupass seal.

Companies must ensure the traceability of the down and feathers using a documentation standard developed by DIN CERTCO. Traupass holders are regularly monitored by accredited testing institutes.

The down and feathers used as filling materials can be traced back using customs declarations, official certificates and delivery notes. Down and feathers obtained by animal cruelty may not be used.

## Best quality and strict controls

For products awarded the Traupass seal, only down and feathers that meet the two highest categories of EN 12934 may be used.

Accredited testing institutes carry out monitoring of filling materials, checking their composition and ensuring they have the correct declarations.

Traupass products from various manufacturers are bought anonymously from retailers and tested.

DIN CERTCO, a notary's office and the manufacturer whose goods are being tested receive the test results. Penalties for materials that do not meet requirements include removal of the Traupass seal.
